

M= 1:50

The technical drawing consists of two parts. The top part is a cross-sectional view of a mechanical component, showing a central shaft with a series of vertical lines indicating a threaded or grooved section. The bottom part is a dimensioned view of the same component, showing a total width of 750 and three individual segments of 200 each, with a small gap between the segments.

The technical drawing consists of two parts. The top part is a cross-sectional view of a mechanical component, showing a central shaft with a series of vertical lines indicating a threaded or grooved section. The bottom part is a dimensioned view of the same component, showing a total width of 750 units. The width is divided into three equal sections, each labeled 200 units, with a small gap between the sections.
