

Technical drawing of a ramp cross-section, showing three views with dimensions in mm.

Top View: Shows the overall width of 2860 mm and the width of the two cross-sections of the ramp, 2530 mm. The distance between the centerlines of the cross-sections is 570 mm. The width of each cross-section is 230 mm. The distance from the centerline of a cross-section to the edge of the ramp is 165 mm. The width of the ramp base is 130 mm. The height of the ramp base is 70 mm. The height of the ramp cross-section is 150 mm.

Side View: Shows the profile of the ramp cross-section. The total width is 2860 mm. The width of the two cross-sections is 2530 mm. The distance between the centerlines of the cross-sections is 570 mm. The width of each cross-section is 230 mm. The distance from the centerline of a cross-section to the edge of the ramp is 165 mm. The width of the ramp base is 130 mm. The height of the ramp base is 70 mm. The height of the ramp cross-section is 150 mm.

Front Elevation: Shows the profile of the ramp cross-section. The total width is 2860 mm. The width of the two cross-sections is 2530 mm. The distance between the centerlines of the cross-sections is 570 mm. The width of each cross-section is 230 mm. The distance from the centerline of a cross-section to the edge of the ramp is 165 mm. The width of the ramp base is 130 mm. The height of the ramp base is 70 mm. The height of the ramp cross-section is 150 mm. The drawing also shows the reinforcement details, including 8 bars and 8 bars, and the reinforcement layout.
